Brigador Killers: The Next Itch Build

The YouTube video above showcases several new elements of Brigador Killers such as the inventory system, changes to aiming on foot, all-new vehicle engine noises, new sprite renders, and a little surprise for your ears at the end. The link below is to a Steam news post that goes into more detail on each part of the video with timestamps included.

We intend to update the build in the next couple of weeks, and owners of the Itch build should get a notification via email whenever a new download becomes available.

Brigador's Birthday Bash

The start of June is the anniversary of Brigador: Up-Armored Edition's release and we try to mark it every year. So, on the week of **June 9th to June 16th** we will not only be running an increased discount on the game (going from 68% off to 70% off), but we will also be running a special 25% discount off all orders on our merch store at that time. We'll announce the merch store discount code loudly (and frequently) on our social media and Discord server.

Community Spotlight

May was fairly quiet on the **#becks_best** front. **Jellybeans** shared their sketch of a Lowmil loyalist tank in **#design_bureau...**

...and **Flyingdebris** was inspired by a recent social media post of someone dumping several cans of an energy drink over themselves to create this "rockstar spacer".

If you want more, you know where to find the archive of goodies.

Next Month

In June we'll be marking Brigador's birthday along with responding to feedback to the Itch update.
